

REACTION MECHANISM DIGITAL TWIN

OPEN SOURCE

Calibratable pathway analysis with explicit transition-state acceptance gates

MIT | v0.1.0

Turn structures and archived quantum results into an auditable mechanism claim, without treating convergence as proof.

VALIDATE INPUTS

Atom conservation, mapping, charge, spin

PREPARE ENDPOINTS

Local structures plus Rowan conformers

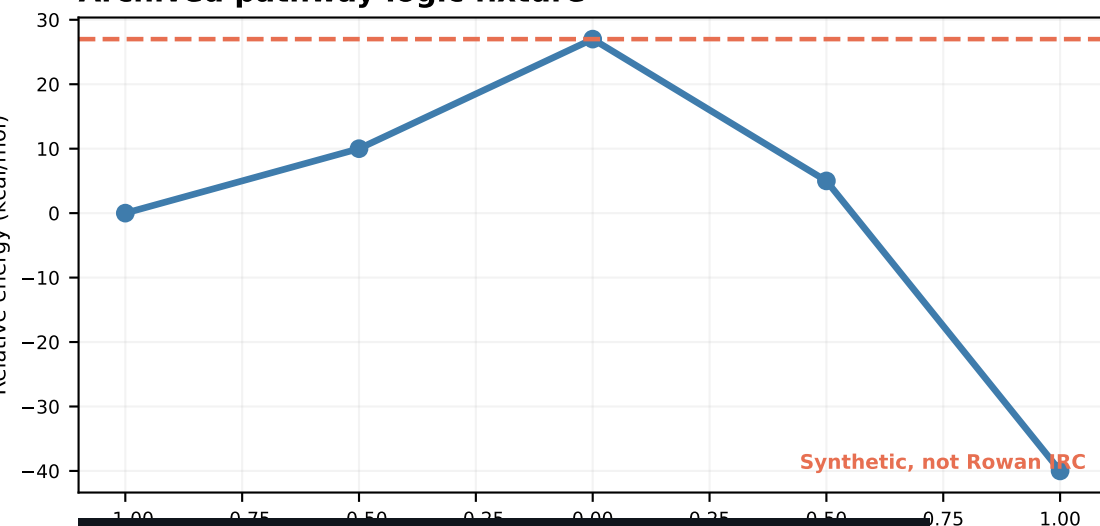

GATE THE TS

Imaginary mode, geometry, and path check

COMPARE EVIDENCE

Thermochemistry, kinetics, uncertainty

Archived pathway logic fixture

1
